# Welcome to the XSEDE Big Data Workshop

#### John Urbanic

Parallel Computing Scientist
Pittsburgh Supercomputing Center

#### Who are we?

# Your hosts: Pittsburgh Supercomputing Center

#### Our satellite sites:

**Tufts University** Purdue University **Howard University Texas Tech University** University of Cincinnati Stony Brook University University of Delaware Kansas State University Arizona State University George Mason University Carnegie Mellon University University of Nevada, Reno Pennsylvania State University Georgia Institute of Technology University of Houston-Clear Lake Lawrence Berkeley National Laboratory National Center for Supercomputing Applications

Extreme Science and Engineering Discovery Environment

National Center for Supercomputing Applications
University of Tennessee, Knoxville - National Institute for Computational Sciences

#### Who am I?

John Urbanic
Parallel Computing Scientist
Pittsburgh Supercomputing Center

What I mostly do:

Parallelize codes with

- MPI, OpenMP, OpenACC, Hybrid
- Big Data, Machine Learning

## **XSEDE HPC Monthly Workshop Schedule**

October 2-3

November 6

December 4-5

January 16

February 12-13

March 5

April 2-3

May 6-7

June 3-6

August 6-7

September 3-4

October 1-2

November 5

December 3-4

HPC Monthly Workshop: MPI

HPC Monthly Workshop: OpenACC

HPC Monthly Workshop: Big Data

HPC Monthly Workshop: OpenMP

HPC Monthly Workshop: Big Data

HPC Monthly Workshop: OpenACC

HPC Monthly Workshop: Big Data

HPC Monthly Workshop: MPI

Summer Boot Camp

HPC Monthly Workshop: Big Data

HPC Monthly Workshop: MPI

HPC Monthly Workshop: Big Data

HPC Monthly Workshop: OpenMP

HPC Monthly Workshop: Big Data

## HPC Monthly Workshop Philosophy

- Workshops as long as they <u>should</u> be.
- You have real lives...
   in different time zones...
   that don't come to a halt.
  - Learning is a social process
    - This is not a MOOC
    - This is the Wide Area Classroom so raise your expectations

# Agenda

Tuesday,	February 12
11:00	Welcome
11:25	A Brief History of Big Data
12:00	Hadoop
12:30	Intro to Spark
1:00	Lunch Break
2:00	Spark
3:30	Spark Exercises
4:30	Spark
5:00	Adjourn

#### Wednesday, February 13

VVEUHESUE	dy, i ebidaly 13
11:00	Machine Learning: A Recommender System
1:00	Lunch break
2:00	Deep Learning with TensorFlow
4:30	A Big Big Data Platform
5:00	Adjourn

## We do this all the time, but...

- This is a very ambitious agenda.
- We are going to cover the guts of a semester course.
- We may get a little casual with the agenda.
- o Three reasons we can attempt this now:
  - Tools have reached the point (Spark and TF) where you can do some powerful things at a high level.
  - We are going to assume you will use your extended access to do exercises. Usually this is just a bonus.
  - Worked last time.

#### Resources

## Your local TAs

Questions from the audience

#### On-line talks

#### bit.ly/XSEDEWorkshop

Copying code from PDFs is very error prone. Subtle things like substituting "-" for "-" are maddening. I have provided online copies of the codes in a directory that we shall shortly visit. I strongly suggest you copy from there if you are in a cut/paste mood.

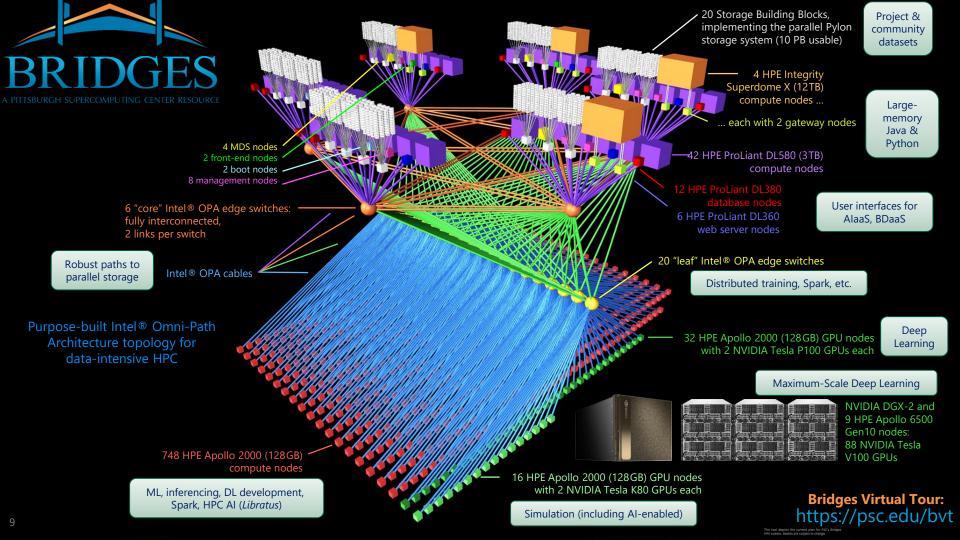

#### The YouTube Channel Has Arrived!

Due to overwhelming demand, and a lot of editing, we have begun to post workshop videos on the XSEDE Monthly Workshop Training Channel:

## **XSEDETraining**

They will be incrementally appearing in the coming months. Subscribe and give us feedback.

Type	RAM	#	CPU / GPU / SSD	Server
Турс	12 TB <sup>b</sup>	2	16 × Intel Xeon E7-8880 v3 (18c, 2.3/3.1 GHz, 45MB LLC)	Sciver

DDR4-2400

d. DDR4-2666

## Getting Time on XSEDE

Extreme Science and Engineering Discovery Environment

https://portal.xsede.org/web/guest/allocations

## **Getting Connected**

The first time you use your account sheet, you must go to apr.psc.edu to set a password. You may already have done so, if not, we will take a minute to do this shortly.

We will be working on bridges.psc.edu. Use an ssh client (a Putty terminal, for example), to ssh to the machine.

At this point will be on a login node. It will have a name like "login001" or "login006". This is a fine place to edit and compile codes. However we must be on compute nodes to do actual computing. We have designed Bridges to be the world's most interactive supercomputer. We generally only require you to use the batch system when you want to. Otherwise, you get your own personal piece of the machine. For this workshop we will use

#### interact

to get a regular node of the type we will be using with Spark. You will then see name like "r251" on the command line to let you know you are on a regular node. Likewise, to get a GPU node, use

#### interact -gpu

This will be for our TensorFlow work tomorrow. You will then see a prompt like "gpu32".

Some of you may follow along in real time as I explain things; some of you may wait until exercise time, and some of you may really not get into the exercises until after we wrap up tomorrow. It is all good.

## Modules

We have hundreds of packages on Bridges. They each have many paths and variables that need to be set for their own proper environment, and they are often conflicting. We shield you from this with the wonderful modules command.

You can load the two packages we will be using as

#### Spark

module load spark

#### **Tensorflow**

module load tensorflow/1.5 gpu

If you find either of these tedious to repeat, feel free to put them in your .bashrc.

## **Editors**

For editors, we have several options:

- emacs
- vi
- nano: use this if you aren't familiar with the others

For this workshop, you can actually get by just working from the various command lines.

## Programming Language

- We have to pick something
- Pick best domain language
- o Python
- But not "Pythonic"
- I try to write generic pseudo-code
  - o If you know Java or C or R, etc. you should be fine.

#### Warning! Warning!

Several of the packages we are using are very prone to throw warnings about the JVM or some python dependency.

We've stamped most of them out, but don't panic if a warning pops up here or there.

In our other workshops we would not tolerate so much as a compiler warning, but this is the nature of these software stacks, so consider it good experience.

# Our Setup For This Workshop

After you copy the files from the training directory, you will have:

```
/BigData
/Clustering
/MNIST
/Recommender
/Shakespeare
```

Datasets, and also cut and paste code samples are in here.

## Code of Conduct

XSEDE has an external code of conduct for XSEDE sponsored events which represents XSEDE's commitment to providing an inclusive and harassment-free environment in all interactions regardless of gender, sexual orientation, disability, physical appearance, race, or religion. The code of conduct extends to all XSEDE-sponsored events, services, and interactions.

Code of Conduct: <a href="https://www.xsede.org/codeofconduct">https://www.xsede.org/codeofconduct</a>

#### **Contact:**

- Event organizer: Tom Maiden, PSC (tmaiden@psc.edu)
- XSEDE ombudspersons:
  - Linda Akli, SURA (<u>akli@sura.org</u>)
  - Lizanne Destefano, Georgia Tech (<u>lizanne.destefano@ceismc.gatech.edu</u>)

## Preliminary Exercise

Let's get the boring stuff out of the way now.

- Log on to apr.psc.edu and set an initial password if you have not.
- Log on to Bridges.

```
ssh <u>username@bridges.psc.edu</u>
```

Copy the Big Data exercise directory from the training directory to your home directory.

```
cp -r ~training/BigData .
```

- Edit a file to make sure you can do so. Use emacs, vi or nano (if the first two don't sound familiar).
- Start an interactive session.

```
interact
```
